

Many End-Time Prophecies are Being Fulfilled

Fred R. Coulter—July 30, 2011

Greetings, everyone! Welcome to Sabbath services. Glad you are here for Sabbath and today we're going to cover some things that I've accumulated for quite a while.

I went through my big stack of reports that I have saved up. Dolores told me, 'What are you going to do with all those papers?' It was a mess. I went through and I sorted out, so we're going to have kind of a summary of things today of different things going on in the world that are taking place, that the world is so focused in on what's happening with the so-called budget and the deficit in Washington, D.C., that none of these things get reported. We're going to go ahead and do that today.

Here we go; I've got a big stack of them right here. I'm not going to be reading all of them. Otherwise I'd be spending all the time reading, but I'm going to summarize some of the things that are taking place. We know many of the Scriptures, which say, 'In the last days perilous times shall come.' And as we have covered concerning the prophecies, God is not going to fulfill them to the minimum. He's going to fulfill them to the maximum.

We find perils everywhere in almost anything that's going on today. Now here's a study concerning genetically-modified foods. What they found is this: they put insect repellent into the genetic structure of the plant. And a new study [*Study found Toxin from GM Crops is Showing up in Human Blood* (Mercola.com)]:

A new study is causing fresh doubts about the safety of genetically modified foods. The research found BT toxin, which is present in many GM (genetically modified) crops, in human blood.

When they brought it to the FDA or whoever they bring it to for the approval, said, 'Well, this will be digested away in the human gut.' It is, right into the blood stream.

The BT toxin makes crops toxic to pests, but it has been claimed that the toxin poses no danger to the environment or human health...

Remember, whenever they say that, it probably does.

...the argument was that the protein breaks down in the human gut. But the presence of the toxin in human blood shows that this does not happen.

They've also found this:

India Today reports: Scientists...have detected the insecticidal protein...circulating in the blood of pregnant, as well as non-pregnant women. They've also detected the toxin in fetal blood, implying it could pass on to the next generation.

The report is about 18 pages long; that gives you the headline in it.

Be prepared for skyrocketing food prices around the world. The reason that there is going to be this is because of drought, talk about that in a bit, floods, failed crops. Now recently I had to make a trip down to Texas and I drove by some cornfields and the corn is about two and a half feet high, completely withered—nothing!—field after field after field. We just found out on the news, before coming to Sabbath services, that the tropical storm which was to bring as much as five inches of rain to the drought-stricken Texas area, well, it bombed out and the maximum they're going to get in some areas is about an inch. After you've had four years of drought, it's going to affect the food supply.

So this report says, from the Bob Livingston Letter (www.boblivingstonletter.com):

One out of every six people on earth is under-nourished and many die of starvation.

Where do we have famine today? *Somalia, Ethiopia, Darfur!* There will be other areas coming up.

The World Watch Institute estimates that 1.2-billion people were under-nourished in 2009, a 12% increase over the previous year.

And remember, babies are continually being born, so we've got that.

All food shortages, as well as financial chaos, high food prices, is related to the collapse of the purchasing power of fiat-money.

We've got the big argument in Washington, D.C., about the money and the budget and everything like that. And the reason we do is because our economy is debt-based and we'll talk an awful lot about that a little later.

They've had food riots in thirty countries and it will not in any way relieve the food prices, food shortages and starving people. Food is worth far more when money is

scarce. A prudent and wise person will store food long before there is a visible need. When starvation begins, it's too late. I started forty-five years ago when storing food was a joke.

Then it goes through and gives all the different things that they have concerning that. Now we've heard that there are going to be signs in the heavens—right? I 'love' all the experts when they make all of these pronouncements, because there's a greater expert in heaven above who foils them all.

Luke 21:25: "And there shall be signs in *the* sun and moon and stars..." All right, now there have been signs in the sun. Actually, after all the radiation that came out, there's another report, which shows that the sun destroys the radiation very quickly. And as I mentioned before, this has really thrown havoc upon all of those who believe in the half-life of carbon-14 dating.

Let's see what's happening here. The Solar System Weather Report (blog.imva.info/world-affairs/solar-system-weather-report). Many people don't realize it, but there's a balance of the magnetic field between the sun and the earth and Saturn. Saturn sends off a lot of magnetic balancing toward us. So, right now there is vast thunderstorm on Saturn. It started in the closing weeks of 2010. It's still going on and it is causing the scientists to wonder what on earth is happening and how that's going to affect the earth.

But what they understand is this: The whole solar system is warming up. I'll tell you why it's warming up, that's because of all of the men out in space and all of their pollution. You know the EPA has it wrong and Al Gore is not telling us the real reason. And also that the sun's angle to the earth is a little different and how that became a little different, they don't quite know. But it is causing drought in Alaska. So everything is upset and upside down.

Verse 25: "And there shall be signs in *the* sun and moon and stars, and on the earth distress and anxiety among *the* nations, *the* seas roaring with rolling surges." We've had that with the tsunami—haven't we? They'll still be coming.

Here's another one concerning food. This whole report is 14 pages. Getting Used to Life Without Food (financialsense.com). Try that for a while. Now the problem is this, as one man said:

A man can get used to pretty much anything with time, except dying...and even that with some practice.'

I suppose he may be referring to morticians, or something.

While a state has it, it seems, we, the vast majority of the human race are about to

test the adage in regard to the availability of our daily bread itself. Food is one of those funny things it's hard to live without. We all tend to take it for granted that our local supermarket will continue to offer whatever we wish, in abundance, at affordable prices or nearly so. Yet living without adequate food is the growing prospect facing hundreds of millions if not billions of us over the coming years. In a sense, it's a genuine paradox.

Our planet has everything we need to produce nutritious natural food to feed the entire world population many times over. This is the case despite the ravages of industrialized agriculture over the past half-century or more. Then, how can it be that our world faces, according to some predictions, the prospect of a decade or more of famine on a global scale?

There are several reasons:

1. They have eliminated emergency food supplies
2. The speculators and traders on a global basis are getting involved and they are driving the commodities higher and higher.

Every time something hits, like the drought that was last year in the Soviet Union, then they start driving up the prices even more. What is going to happen, it's going to force a scarcity of food because of higher prices.

If you want a really, really good loaf of bread today and you go someplace where they make really good bread, how much do you pay for that? *You pay between \$4-\$5 for a loaf of bread.* Try \$10! Try \$15!

Agribusiness as a Long-Term Strategy (facebook: by One person can make a difference, August 1, 2011):

Bio-fuels are highly undesirable for countless reasons, as many serious environmental organizations have begun to realize. The corn ethanol industry has grown, largely due to powerful corn and oil lobbies.

Again the speculators, so they can make money. Now this is why—let's add into the equation, I've been talking about world religion. Let's come back here and again review Revelation 18 for just a minute, because Rev. 18 has some things to say concerning what we call multi-national corporations or merchants, and all the speculations that they have, all the things that they do to create a bubble, make a profit going up, burst the bubble, make a profit going down. And that's what they do.

Let's read concerning Babylon the Great, Revelation 18:2: "And he cried out mightily with a loud voice, saying, 'Babylon the Great is fallen, is fallen, and has become a habitation of demons, and a prison of every unclean spirit, and a prison of every unclean and hated bird; because all nations...' (vs 2-3). The whole theme of the book of Revelation is global, worldwide, all nations, all the way through it. That's why in the centuries before ours they couldn't understand the book of Revelation, because they couldn't conceive that God would be great enough to include the whole world, nor that man would come to the point as they had before the Flood, and we'll check that in a little bit, where that all of these things could be affected globally. Look at the news.

"...all nations have drunk of the wine of the fury of her fornication, and the kings of the earth have committed fornication with her, and the merchants of the earth have become rich through the power of her luxury'" (v 3). Those are the multi-national corporations, the ones who control the food supply, the ones who bring upon us unfit things to eat.

I'll give you a simple rule on how to look for food to eat: *Buy nothing in a box!* The store has all of the 'live' food: fresh produce, fruit and everything along the edge. They have some things frozen. Frozen things, if you shop well, are good. Then the next one down is canned foods. The worst foods of all are dried cereals. And most people don't realize dried cereals with milk and sugar creates a lot of unwanted bacteria and fungus in your system. Just a thought! If you think that's radical, which some people may think that's radical, go online and look some of these things up yourself. Study them out for yourself, and you'll find that most of the food that people eat today is unfit for human consumption.

Now, Dolores is a great shopper and we live in a great area where we can get most everything organic and even raw milk. But one quart costs \$5.25 with a bottle deposit.

High demand will likely increase corn ethanol and gas prices as corn ethanol is mixed with gasoline. Ethanol energy gets very poor fuel economy with standard engines. And most importantly, it is simply not possible to produce the amount of corn required to make the fuel a viable alternative to oil or a serious supplier of energy.

Plus they're now understanding that it pollutes the atmosphere worse than oil. Now as we go through this, I want you to keep in mind, Proverbs says, 'There's a way that seems right to a man, but the ends thereof are the ways of death.' So, every good thing that men come up with when they leave God,

ends up being evil, and comes back as a boomerang to trip them up, because it doesn't work.

New Global Dustbowl?

Well, we're going to see a lot of those. Then there are two pages of reference to it.

Now concerning food, here's another article:

[Franken Food](http://frankenfoods.com) (frankenfoods.com)

Now what is that? Remember the movie, *Frankenstein*? Oooh, are we getting close to that today? *Yes!* Well, there's Franken Food and guess what's happening? Here's something you need to think about. It's got genes from a firefly, a French fry, a tomato, and a Toyota.

Genetic manipulation creates a tangy-taste treat with a special side effect. Add one alignment of your choice to any place you control so long as it doesn't have the opposite alignment already, you may not remove or reverse an alignment with this card.

So it shows this card: Franken Food

The incredibly powerful disease, Morgellon, is on the verge of going pandemic, but the average doctor still knows so little about it that they usually cannot correctly diagnose it. If this terrifying new disease is proven to be genetically linked to modified foods, we truly do have a 'Frankenfood' in our midst.

Then it goes on showing various things of how that can happen. Let's see some things that it says back here, if you read Deuteronomy 28 very carefully, you're going to find that every one of the curses that are listed there are currently happening *right now!*

Come to Deuteronomy 28:33: "The fruit of your land and all your labors shall be eaten up by a nation which you do not know. And you shall only be oppressed and crushed always, and you shall be driven mad because of that which you shall see with the sight of your eyes. The LORD shall strike you in the knees and in the legs with an evil ulcer that cannot be healed, from the sole of your foot to the top of your head" (vs 33-35).

Verse 21: "The LORD shall make the pestilence cling to you until He has consumed you from off the land where you go to possess it. The LORD shall strike you with lung disease and with a fever, and with an inflammation, and with an extreme burning, and with the sword, and with blasting, and with mildew. And they shall pursue you until you perish. And your heavens over your head shall be bronze, and the earth that is under you

iron.... [That's a good description of Texas and parts of Oklahoma.] ...The LORD shall make the rain of your land powder and dust. It shall come down from the heavens upon you until you are destroyed" (vs 22-24). Did you see the dust storm in Phoenix the last few weeks? The front of the cloud was 3,000 feet in the air. Read some more. A lot of people don't like to read it, because it's so negative. Well, if it's true, you better find out something about it.

Here's another article I want to read. You want to know why God is so angry? People say, 'Well, why would God do this, men are just trying to do their best.' Are they seeking God? Are they looking to Him? Are they wanting the answers from the Word of God? A lot of people don't even know this. Here's what they are doing in the United Kingdom and also here.

150 Human Animal Hybrids grown in UK labs: Embryos have been produced secretly for the past three years (by Daniel Martin and Simon Caldwell, dailmail.co.uk)

Scientists have created more than 150 human-animal hybrid embryos in British laboratories. The hybrids have been produced secretly over the past three years by researchers looking into possible cures for a wide range of diseases.

Well, now there's a movie out which shows the *Planet of the Apes* and how they bred human genes into the ape family and now they're coming to take over the world. So people laugh at that, but that's what they're trying to do.

The revelation comes just a day after a committee scientist warned of a nightmare "Planet of the Ape" scenario in which work on human/animal creations goes too far.

Now it shows that they have this.

This legalised the creation of a variety of hybrids including an animal egg fertilised by human sperm, 'cybrids,' in which a human nucleus is implanted into an animal cell; and 'chimeras,' in which human cells are mixed with animal embryos.

Scientists say the techniques can be used to develop embryonic stem cells which can be used to treat a range of incurable illnesses.

My, aren't we good. When they already know that you can get stem cells from your own body and you can use those to help heal your body. They know that, but do you think that they would teach people to live by God's laws? *Oh, no!* This is what happens when they get rid of God. This is what happens when they are so great that they cast God away.

Three labs in the UK [are doing it.]... All have now stopped creating hybrid embryos due to the lack of funding...

Hooray! You want to know why the pound is going down? That's one of the reasons.

...but the scientists believe that there will be more such work in the future.

Shows what they're doing.

Let's look and see another problem. It's right happening today. I've said how many times, read Deut. 28 through. If you haven't read it through, read it through. It'll be astonishing! It's like an update on today's news. We've got all the argument going on—don't we?—back there in Washington, D.C., about the debt limit. Plus we have this other problem, a two-fold problem that comes right down the line here.

Verse 43: "The stranger *dwelling* among you shall get up above you very high..." Remember when we went through the 14 points of prophecy to happen and I covered that? And I said we were just right about at the tipping point. You know the fulcrum is the tipping point like a teeter-totter. And when it goes too far one way, it goes all the way down.

"...and you shall come down very low.... [The process is making rapid progress right now. It is happening!] ...He shall loan to you, and you shall not loan to him... [Does that sound like our government? *Yes, indeed!* Sound like our banks? *Yes, indeed!*] ...He shall be the head, and you shall be the tail" (vs 43-44). All of these things are happening. There may be a couple of things which may defer some of this for a while, which we'll talk about a little later on. But these things are happening and coming upon us.

Verse 45: "And all these curses... [We know who the children of Israel are—don't we?] ...shall come on you..." When God says 'all shall,' He means it. The human mind is so perverse that it thinks it can live in sin and yet receive the blessings of God.

And when the curses and correction come, which are as automatic as the law of gravity, they say, 'Oh, God is cruel. I'll show you that there's one man who was a leading theologian in the Southern Baptist church for 27 years and he was one who stealthily snuck in and he writes a big article, *Is God a Christian?*

They shall come. "...and shall pursue you and overtake you... [like the waves of the sea] ...until you are destroyed because you did not obey the voice of the LORD your God... [How many times have we covered that? Simplicity of God's way and

Christ is: ***Obey My voice!***] ...you did not obey the voice of the LORD your God to keep His commandments and His statutes which He commanded you. And they shall be on you for a sign and for a wonder, and on your seed forever.... [From that time forward as long as there are people descending from the children of Israel, and we are.] (Here's the reason): ...Because you did not serve the LORD your God with joyfulness and with gladness of heart for the abundance of all *things*" (vs 45-47). No, we didn't do that.

Why don't you do this, you want to know how bad things are? I don't know how many channels you have your TV, but why don't you do a channel surf through every single channel and see what's on. And when you do, open here to 2-Timothy 3, and this is what you're going to see. Because this is what you see in politics. This is what you see in the country. This is what you see in the way of everyone's life today.

Just the other day Dolores and I were watching this ad for this medicine. Again, look at all the ads on television. There's not one thing wrong with the world. Everybody's happy, everybody's beautiful, everybody's got it made—right?

Here's what you're going to see, 2-Timothy 3:1: "Know this also, that in the last days perilous times shall come; for men will be lovers of self, lovers of money, braggarts, proud, blasphemers, disobedient to parents, unthankful, unholy" (vs 1-2).

We were just watching television here recently. And guess what they want to do in restaurants? Ban children, because they're so disobedient. They get up and run around the restaurant. Get up and stand and jump up and down on the chairs.

"...unthankful, unholy, Without natural affection, implacable, slanderers, without self-control, savage, despisers of those who are good, betrayers, reckless, egotistical, lovers of pleasure rather than lovers of God" (vs 2-4). Boy, is that not true? Everybody's happy because now we have football. The strike and lockout was settled. And there are millions of idolaters over football. It's not wrong to watch it, but you need to understand how people get carried away with it.

And like one man went down to watch a baseball game at Dodger Stadium. You probably heard about this. Three men came up and beat him senseless and he's still in a coma. Yet, at the same time they have this. They're still religious.

Verse 5: "Having an outward appearance of Godliness, but denying the power of *true* Godliness. But *as for you*, turn away from *all* these."

All right, now let's see how all of this comes together, because it hits everybody in the pocket book. And I'm telling you, as I've told you in the past, that they are working toward the *mark of the beast*, because that's going to be the only solution to all of these problems the way that man looks at them. And they are trying to get there as fast as they can.

From Hawaiian-tv.com:

- [Hyper-Inflation Nightmare Dead Ahead](#). There it is. It's coming. And in this report, an eye-opening report.
- [Why China is Jumping the Ship](#), that is getting rid of dollars.
- [World Confidence in the U.S. Dollar is Evaporating](#). Watch any report on the dollar.
- [Plus how the Fed-cats in Washington are lying through their teeth about the Federal Debt](#). Don't think that if you join the Tea Party and you vote Republican, you're going to change a thing in Washington, D.C.

While all international investors watch mountains of toxic debt pile up faster than at any point in American history...

—or European history either. It's something. So then he gives ways how you can probably protect yourself. Won't get into the report.

Here's another one. We have been told. These reports come out all the time. You don't see these in your newspaper—do you? Maybe somewhere you might see a little bit, but they don't want the people to know. They don't want the people to know that the fiat currencies that we have are really worthless. Here's a report:

[Fifty Things Every American Should Know About the Collapse of the Economy](#). (theeconomiccollapseblog.com)

I won't go into all 50 things, but these you can find online.

Right now we are witnessing a truly historic collapse of the economy...

How about .04 for the growth of the economy?

...and yet most Americans do not understand what's going on. One of the biggest reasons why the American people do not understand what is happening to the economy is because our politicians and mainstream media are not telling the truth.

And not even those who are supposed to be telling the truth. Who can you trust? Boehner, McConnell, Reid, Pelosi, Obama, Bernanke, Geithner? Who can you trust? The reason that you can't trust them, is

because all of those in Washington, D.L.C. (District of Liars and Corruptors), are in a great suffocating dome of stupidity and ignorance and political nightmare. And if you try and do the right thing, you're radical!

Barack Obama and Fed Reserve Chairman, Ben Bernanke, keep repeating the phrase "economic recovery" over and over, and this is really confusing for most Americans because things sure don't seem to be getting much better where they live. There are millions upon millions of Americans that are sitting at home on their couches right now wondering why they lost their jobs and why no one will hire them.

And the actual unemployment rate is more like 20%.

Millions of others are wondering why the only jobs they can get are jobs that a high school student can do.

And then think about all the graduating high school students and think about all those graduating out of college. Where are they going to go? Think about all of those. In order to keep the economy just at a level keel, they have to create 250,000 jobs *every month*, just here in the United States to accommodate college graduates, high school graduates and hopefully to get some of the unemployed employed. We have an administration that is set to destroy this nation.

Families all across America are wondering why it seems like their wages never go up but the price of food and the price of gas continue to skyrocket.

What are we going to do? Remember one time we were talking about how gas was going to go up and I said, 'What are you going to do when it's \$10 a gallon?' *Well, we're almost half way there*—right?

We are facing some very serious long-term economic problems in this country, and we need to educate the American people about why the collapse of the economy is happening.

It is planned.

If the American people don't understand why they are losing their jobs, why they are losing their homes and why they are drowning in debt then they are going to keep on doing all of the same things that they have been doing. They will also keep sending the same idiot politicians back to Washington to represent us.

And that's in this report, but I agree with it.

The American people need to be shocked out of their entertainment-induced stupor long enough to understand what is really going on and what needs to be done to solve our nightmarish economic problems. If we do not wake up enough Americans in time, the economic collapse that is coming could tear this nation to shreds.

And after that, fifty things you can do so maybe you can survive.

Let's see what is already happening. Let's see how the cities are. Let's again go back to Deuteronomy 28. Let's see what God says it's going to be like in the cities. Anyone want to buy a piece of Detroit? I'll read you a little bit about it. You know what they're doing to neighborhoods in Detroit because they can't sell the homes? They are bulldozing the houses to the ground.

Anyone want to move to central Los Angeles where 40% of the people are government dole and over 80% of them are illegal aliens protected by a Spanish mayor. Isn't that wonderful? Police can't go in there to do anything because the gangs rule it. But they vote for him and he's interested in his power, just like Barack Hussein—and you can rhyme the word with that—Obama.

(go to the next track)

Let's go to Deuteronomy 28:15, and then I will read you some reports from what is called, *End-Time Editorials*. There are a lot of people doing a lot of witnessing and the more voices out there witnessing as to what's happening and what's taking place, the better, because if there is going to be anything to have a turn around, it's going to require a good deal of repentance.

We don't know how it's going to fall. We'll cover some of those things a little later, but I think it's absolutely clear that the kind of repentance that is really needed is never going to happen on the scale it needs to. We're going to talk about the cities in America now, some of the cities and some of the states and what is happening,

Deuteronomy 28:15 "And it shall come to pass, if you will not hearken to the voice of the LORD your God... ['hearken' means *listen to obey*. And it has that strength and that force. It's not just, 'I hear you.' No, it is *hearken*.] ...to observe and to do all His commandments and His statutes which I command you today, all these curses shall come upon you and overtake you." It is automatic! You can take these same things, look at every nation in the world and examine what they are like, what's happening to them.

Verse 16: “Cursed *shall* you *be* in the city, and cursed *shall* you *be* in the field. Cursed *shall be* your basket and your store. Cursed *shall be* the fruit of your body, and the fruit of your land, the increase of your livestock, and the flocks of your sheep. Cursed *shall* you *be* when you come in, and cursed *shall* you *be* when you go out.... [That’s how people feel today—right? *Yes!*] ...The LORD shall send on you cursing, vexation, and rebuke in all that you set your hand to do until you are destroyed, and until you perish quickly because of the wickedness of your doings *by* which you have forsaken Me.” (vs 16-20). That is what has happened.

Let’s come here to Isaiah 5 for just a minute, since we’re going to talk about cities. Let’s see what God says about building cities the way that we build them today. I remember the first time I came into San Francisco. I could not believe that they build houses wall-to-wall, and they actually bought and sold them like regular houses.

Where I came from in Washington, in Seattle, they had big yards, plenty of room between the houses, but here in San Francisco, they’re just house built right next to each other. Now if you wanted to pay a higher price, you had to move someplace where they give you four feet between the houses.

Isaiah 5:8: “Woe *to* those who join house to house, that lay field to field, until there is no place left... [Think about New York City, Chicago, Los Angeles, Dallas, Houston, just to name a few.] ...and you are made to dwell alone in the midst of the land! The LORD of hosts *swore* in my ears, ‘Truly, many houses shall be deserted, *even* great and fair, without inhabitant’” (vs 8-9). Well, is that happening in America?

The End Time Editorials:

American Hellholes

(theeconomiccollapseblog.com/archives/american-hellholes)

The U.S. economy is dying and we are headed for the next Great Depression. The talking heads in the mainstream media love to spread economic numbers around and around and they love to make it sound like the economy is improving, but the truth is that it doesn’t take a genius to see what is happening to the U.S. economic system.

I know right here in Hollister, I remember several years ago, had a hard time crossing the street from here where the office is to the bank where we bank across the street. Most of the time now I go up there and there’s not a car for a block and a half to the right and there’s not a car for a block and a half to the left.

And when I drive up to Fairfield, there are times when I look ahead of me and it’s more than a mile before I see another car. And I look in the rear view mirror and it’s about the same to find another car behind me. Why? Because in California, there have been probably close to 7 or 8-million people move away because of the joblessness, foreclosures.

All over the nation many of our greatest cities are being slowly but surely transformed into post-apocalyptic wastelands

In other words, looks like it’s gone through the book of Revelation already.

All over the mid-Atlantic, all along the Gulf coast, all throughout the “rust belt” and all over the entire state of California cities that once had incredibly vibrant economies are being turned into rotting, post-industrial hellholes. In many U.S. cities, the “real” rate of unemployment is over 30 percent. There are some communities that will start depressing you almost the moment that you drive into them. It is almost as if all of the hope has been sucked right out of those communities.

If you live in one of those American hellholes you know what I am talking about. Sadly, it is not just a few cities that are becoming hellholes. This is happening in the east, in the west, in the north and in the south. America is literally being transformed right in front of our eyes.

If you still live in an area of the United States that is prosperous, do not mock the cities that you are about to read about. The cold, hard reality of the matter is that economic decline and economic despair are spreading rapidly and they will come to your area soon enough. In the end, no area of the country will completely escape the economic hell that is coming.

I know there will be some people who will say, ‘Oh, you do this to scare me.’ Listen, if this scares you, what are you going to do when the real thing arrives?

Detroit, Michigan: In the city of Detroit today, there are over 33,000 abandoned houses, 70 schools are being permanently closed down, the mayor wants to bulldoze one-fourth of the city and you can literally buy a house for one dollar in the worst areas.

But if you go there, no police, no fire department, and the gangs rule. Think you could afford to pay them?

The city of Detroit, once a shining example of middle class America, is now a rotting cesspool of economic decline and it actually saw its population decline by 25 percent during the decade that recently ended.

That means that Detroit lost a resident of the city ever 22 minutes between the years 2000 and 2010. Think of that!

There simply are no jobs. At the height of the economic downturn, the mayor of Detroit admitted that while the “official” unemployment rate in Detroit was about 27 percent, the “real” unemployment rate in his city was actually somewhere around 50 percent.

Camden, New Jersey. Look at how corrupt that was. Chris Christie is doing what he can to try and straighten it around. But what are you going to do when you have this.

Camden, New Jersey: So is there any place in America that is worse than Detroit? Well, many would nominate Camden, New Jersey. Many years ago, Camden was actually thriving and prosperous. But today the city of Camden is known as “the second most dangerous city in America”.

And here’s why:

Camden is where those discarded as human refuse are dumped, along with the physical refuse of postindustrial America. A sprawling sewage treatment plant on forty acres of riverfront land processes 58-million gallons of wastewater a day for Camden County. The stench of sewage lingers in the streets. There is a huge trash-burning plant that releases noxious clouds, a prison, a massive cement plant and mountains of scrap metal feeding into a giant shredder. The city is scarred with several thousand Camden is where those discarded as human refuse are dumped, along with the physical refuse of postindustrial America. A sprawling sewage treatment plant on forty acres of riverfront land processes 58-million gallons of wastewater a day for Camden County. The stench of sewage lingers in the streets. There is a huge trash-burning plant that releases noxious clouds, a prison, a massive cement plant and mountains of

scrap metal feeding into a giant shredder. The city is scarred with several thousand decaying abandoned row houses; the skeletal remains of windowless brick factories and gutted gas stations; overgrown vacant lots filled with garbage and old tires; neglected, weed-filled cemeteries; and boarded-up store fronts.

Gangs have stepped into the gaping void left by industry.

Imagine that! How are you going to straighten that out? How are you going to turn that around? Well, unless they turn to God, they can’t even have a beginning. Everything you try to do to help them, though it is intended to be good, is going to end up in trouble and difficulty. How else can it be? Here’s a little description of it in Camden:

There are perhaps a hundred open-air drug markets, most run by gangs like the Bloods, the Latin Kings, Los Nietos and MS-13. Knots of young men in black leather jackets and baggy sweatshirts sell weed and crack to clients, many of whom drive in from the suburbs. The drug trade is one of the city’s few thriving businesses... [But they can’t tax it.] ...A weapon, police say, is never more than a few feet away, usually stashed behind a trash can, in the grass or on a porch.

And this is happening in communities from coast to coast. What is happening because of the economic downturn? Well, they have to cut the police force. They have to cut all of those things. And here’s what Chris Christie has inherited. And

...they’re still facing a \$10-billion deficit for this year even after cutting off a billion dollars from the education budget and laying off thousands of teachers.

New Jersey also has \$46 billion in unfunded pension liabilities and \$65 billion in unfunded health care liabilities. Nobody is quite sure how New Jersey is even going to come close to meeting those obligations.

Well, I’ll tell you how they will do it. Like they did with the little town in Alabama. They ran out of money and the teachers and the police and the firemen and the retired city workers all came demanding money. You know what the city council said? ‘We don’t have any money.’ So they were standing out there chanting, ‘We want our money.’ Not going to get it.

New Orleans, Louisiana: It is now almost 6 years later... [after Katrina] ...and virtually the entire region is still a disaster zone. New Orleans permanently lost 29% of its

Many End-Time Prophecies are Being Fulfilled

population...21.5% of all houses in New Orleans, Louisiana, are currently standing vacant. Many of those homes will never be inhabited again.

What made things even worse for New Orleans (and for residents all along the Gulf coast) was the horrific BP oil spill last year. The mainstream news does not talk about the oil spill much anymore, but those living in the area have to deal with the effects every single day.

Then it brings up the city of Vallejo, California. Now that's about 100-miles from here.

Vallejo is still in bankruptcy. The police force shrunk from 153 officers to 92 [because they couldn't get rid of the union.]

Calls for any but the most serious crimes go unanswered. Residents who complain about prostitutes or vandals are told to fill out a form. Three of the city's firehouses were closed. Last summer, a fire ravaged a house in one of the city's better neighborhoods; one of the fire trucks came from another town, 15 miles away. Is this America's future?

Well, everybody wants to cut. Sacramento is suffering one in six businesses closing. Merced, California has declined.

The average price for a house has declined by 63% over the past four years.

California also had more foreclosure filings than any other U.S. state in 2010. The 546,669 total foreclosure filings during the year means that over 4 percent of all the housing units in the state of California

Six of the top seven spots [of the worst cities in America] were held by cities in California. High unemployment—20% of the residents in Los Angeles [not 40, but 20%] receive public aid.

Right now California is also having a huge problem with gangs. Gang violence in America is getting totally out of control

That's going to happen.

Here in Oakland, California. Here are the number of crimes that the department will no longer respond to, because of cuts in the police force:

- burglary
- theft
- embezzlement
- grand theft

- grand theft: dog [if they steal a good dog]
- identity theft
- false information to peace officer
- required to register as sex or arson offender
- dump waste or offensive matter
- loud music
- possess forged notes
- pass fictitious check

Man, all the crooks are going to descend on Oakland. It's going to be bad news.

- obtain money by false voucher
- fraudulent use of access cards
- stolen license plate

Man, what a home for crooks!

- embezzlement by an employee
- extortion
- attempted extortion
- false personification of other
- injure telephone/power line
- interfere with power line
- unauthorized cable tv connection
- vandalism

The police force in Stockton is almost down to nothing. So where's California going to go? Only 66.8% of American men had a job last year. That is the lowest that has ever been recorded in United States history.

All of these are the results of *spiritual problems*, every one of them. You try and solve it economically—not going to happen. You try and solve it politically—not going to happen.

To add to it, the United States has set aside 257, what they call, free-zone places in America that are 50-square miles a piece. South of Boise—this is for foreign businesses—so south of Boise, China is now in a position of tremendous economic power and its going to open up one of those 50-square miles self-sustaining cities south of Boise. A slice of Communist China right in the U.S.!

Well, my suggestion is that all of American industry should apply for that so that they can get free everything and no taxes. Once you have that in there, just think how easy it would be for you to smuggle things in. Bring in arms and voila, right in the middle of Boise there's a 50-man army. Well, in America you don't even have to smuggle them in. You can just go buy the guns—right? *Yes!*

Here's a map, I'll show it to you. Look at all the yellow. All the yellows are counties that have been declared disaster areas for one reason or another.

Show you another: Crop disaster areas. The breadbasket. I ask you, is Deuteronomy 28 being

fulfilled or not? Since we're right here in Isaiah 5, let's read it. Isaiah 5:20: "Woe to those who call evil good and good evil; who put darkness for light and light for darkness; who put bitter for sweet and sweet for bitter!"

One Hundred Christian Ministers Sign Proclamation that Homosexuality is Not a Sin (onenewsnow.com/Church)

Isn't that amazing? And here's the one I told you about and the man who wrote a book, *Is God a Christian?*, and he's a high-level theologian in the Southern Baptist Church and guess what his last name is? *Godsey*, which means it's taken from 'God says.' Won't get into that report.

Now let's talk about some things overseas. How many have heard reports of China? Before I get into China, let me say this. When I talked about the coming world currency and the crash of the dollar, what did we discuss? All of the central banks in the world are going to get all their regulations pretty much lined up. Then the debt crisis is going to hit America. It is going to hit Europe. And when that happens, the whole system totally collapses.

And they are doing this to bring in a world currency. Now it's also going to affect China. China has a big economic bubble. They have many cities, which contain a total of 63-million luxury apartments that they have built, but no one can afford to buy them. These are luxury apartments, these are not little cubby holes. But here's what's happening, right in the middle of it. Remember when the real estate bubble hit here? *It's hitting over in China!*

China Daily Reports Property Loans Halted in 2nd and 3rd-Tier Cities (www.howestreet.com)

That doesn't mean the big cities like Hong Kong or Shanghai, like that.

Commercial banks are halting individual property loans in the face of tightening monetary policy and limited lending quota, the China Securities Journal reported Thursday.

"We will not accept property loan applications at present, even if it is from a first-time home buyer," a bank staff in Chongqing told the paper.

And the bank is saying this:

"You'd better prepare to pay 40 percent of your home price as down payment, because commercial banks are going to ask more for a property loan. It's only a matter of time."

So it's about ready to go pop, just like the American one does. And what are the Chinese going to do? When that happens, China is going to be ready to move. They've got to do something. You can't have all of that economic power collapse. And when it does, what are you going to do with 2-billion people? Nearly 500-million are still poverty peasants out in the countryside. Well, China is looking to build itself up into being a world power. It's not going to stop, it's going to continue.

Here's what they are doing. I've got a report here, I'll just read you the headlines. I have six reports. Remember when I said: What would happen if the administration, and I said, well, maybe Hilary Clinton would be the one to ask, but it was President Obama on his last trip to China. He asked China to help the U.S. with Pakistan and Afghanistan. Remember when I brought that, the first sermon I brought on Afghanistan?

1. Chinese Troops Offer an Afghan Solution

'Why, we will come in, we'll protect our interests, our mining and we will help get rid of the Taliban and we will get rid of all of Al Qaeda for America. Won't that be nice?' And remember that I told you about the trade, the opium trade? If they go, they'll control it and that's 80% of the opium, plus that means 90% of the heroin in the world. And guess where they're going to send it? They're going to send it 'cheapo-cheapo' to Britain and America, especially Britain, because of the opium wars back in the 1830s.

When the war was finally won by the British, they got the Chinese to give them Hong Kong, Shanghai, and all of the ports along the Chinese coast. And the Chinese just got back Hong Kong, what, 15-20 years ago. They'll never forget.

2. China's Taliban Connection

3. NATO Forces Facilitating Afghan/Taliban Talks

4. Chinese War Planes Make Mideast Debut in Turkey and Iran

Flying all the way over there. A little practice for Armageddon—you think? *Who knows!*

5. China Moves Forces into Afghanistan

This was clear back in 2001. Then the last report is:

6. Blast Hits Secret Iranian Missile Launching Pad

Big thick report. Have you heard any of this on your nightly news? In your newspapers? *No!* They must keep all of us brainwashed in our stupidity and happy with our soap operas, our drugs, our sports, and our sex. *Unless there's a return to God, we are*

defeated people right now and every enemy of the United States knows it.

Here's a headline, another report. I've got all kinds of these reports. So many that I just cannot read the whole thing. You'll have to go online and look these up yourself.

China-Pakistan-Afghanistan-Building Economic Ties

(blogs.reuters.com/pakistan/2011/04/28/china-pakistan-afghanistan-building-economic-ties/)

During a visit to Beijing in late 2009, President Barack Obama asked China to help stabilize Pakistan and Afghanistan. The logic was obvious. China is a long-standing ally of Pakistan with growing investments there and in Afghanistan; it has the money to pay for the economic development and trade both countries need; and with its own worries about its Uighur minority...

That's the militant Muslims in western China.

The challenge was in achieving this without angering India, which fought a border war with China in 1962 and is wary of its alliance with Pakistan.

But also Pakistan is going to have China a naval base, right there, right on the Indian Ocean.

Well, let me go to another report. Let's look at Germany. What has Germany always wanted to do? *Control Europe!* That's what WWI was about. That's what it was with Bismarck in 1870. That's what it was with Napoleon in 1805, and now they're about ready to do it. How are they going to do it? *Without firing a single shot.*

The Euro crisis will give Germany the empire it has always dreamed of
(www.blogs.telegraph.co.uk)

And how are they going to do it? *Through the Euro!* What they have done is this. The European leaders made the decision that they are going to defend the Euro, but in order to do that they have to have a single financial entity to run the Euro. With a unified foreign policy, and then what comes next? *Military!* Remember what we've discussed? Europe must rise and they must get rid of the Muslims. If Germany controls it, guess what they're going to tell the Muslims? *Get out!*

...because they have taken that decision to do so, it is almost impossible to overestimate the importance of the decision which the European leaders seemed last night to be reaching, by authorizing a huge expansion in the bail-out fund that is propping up the EU peripheral members,

largely in order to stop the contagion from spreading to Italy and Spain, the Euro-zone has taken the decisive step to becoming a fiscal union. So long as the settlement is accepted by the National Parliaments, yesterday will come to be seen at the witching hour after which Europe will cease to be.

A collection of sovereign nations.

It will have one economic government, one currency, one foreign policy. This integration will be so complete that taxpayers in the most prosperous countries will be expected to pay for the welfare systems and pension plans of failing EU states. This is the final realization of the dream that animated the founders of the Common Market more than a half century ago, which is one reason why so many prominent Europeans have privately welcomed the Euro-zone economic catastrophe, labeling it as a "beneficial crises."

All of these are manufactured to the benefit of those super-elite of the world. And who empowers all of them? *None other than Satan the devil!*

David Cameron and George Osborne have both indicated that they, too, welcome this fundamental change in the nature and purpose of the European project. The markets have rallied strongly, hailing what is being seen as the best chance of a resolution.

While these nations relapse into pre-modern economic systems...

Vassal states just like Hitler wanted.

Germany is busy turning into one of the most dynamic and productive economies in the world. Despite the grumbling, for the Germans, the bail-outs are worth every penny, because they guarantee a cheap outlet for their manufactured goods. Yesterday's witching hour of the European Union means that Germany has come very close to realizing Bismarck's dream of an economic empire stretching from central Europe to the Eastern Mediterranean.

History has seen many attempts to unify Europe, from the Habsburgs to the Bourbons and Napoleon. This attempt is likely to fail, too. Indeed, a paradox is at work here. The founders of the European Union were driven by a vision of a peaceful new world after a century of war. Yet nothing could have been more calculated to create civil disorder and national resistance than

yesterday's demented move to salvage the single currency.

Let's see what else I have. I've got another whole stack of reports here. See what you've been missing out on? Report on George Soros. Remember George Soros is a puppet-master of many, but he is also a puppet-master of the few elite.

Then here's a report: Spiritual Warfare, Unseen Throne Behind the Rising Evil.

Let me get to another one. See what else we have. Here are some headlines, I'll just read off to you:

Legal Opposition to the Introduction of Genetically Altered Alfalfa has been bungled time and again. It is assumed to be by mere incompetence, but now we learn that the lawyers opposing GE seeds receive funding from those who promote GE seeds (genetically engineered).

There are other things here in this report, so I will just end with a couple of things, a little bit of good news. Remember what happened when Governor Walker in Wisconsin got rid of the collective bargaining of the unions saying that that would save the teachers.

Well, what happened? *You're not told what happened!* The teachers' union dictates to the school system what insurance company they have to buy insurance from. And those insurance companies pay the Democrats. And the teachers' union funds the Democratic political machine. So once Walker got that out, put the bid for the school insurance out to another insurance company—guess what? Some school districts went from a deficit of \$400,000 to a surplus of \$1.5-million, because they got rid of the greed and corruption.

Now I want you to understand something very, very important. The German-born pope is making some radical changes in the mass.

Now a little more good news here. Get a severe burn, there is a website, you can Google it, and it is this. Get a severe burn, cool it down with water, then get some egg whites, beat them up, and put it all over the burn. The collagen from the eggs will make the face heal or wherever the burn is. And it talks about a man who had half of his face burned, put that on him, and by the end of the summer—I don't know what they need to do to keep that going, but I would assume keep the egg on, wash it, and put the egg on, and so forth.

By the end of the summer the young man brought the lady a bouquet of roses, because a woman did this in emergency thing when he had his face burned, and he brought some roses to thank her

and his face was like baby's skin. The comment was made by my wife Dolores, who read the whole article and said that even the fire department said they are trained to do that and they said, 'You saved his face.' So in case of burns, run to the refrigerator and get the eggs out.

Sun Neutralizing Radiation. We need that now.

Big Brother has come up with a new database and civil libertarians are all up in arms. Even the ACLU is after them over this. So we'll see what happens.

Because they're giving police cruiser-mounted scanners that capture thousands of license plates per hour, storing that information indefinitely, where local cops, states, feds, and prosecutors can access it if they choose.

I wonder why they were doing that. I saw that going up to Fairfield. Now in California:

Produce pillaging on the rise in California as farm thieves nab fruit, vegetables, farm equipment, and copper.

Crime on the rise. SmartPhones step up—mobile payment push. So they are going to have it everything like we said—wave technology.

Now let's come back to Genesis 6. I don't think we have grasped the severity of what it's like here in the last days, nor have we fully appreciated what is said here in Genesis 6, even though we read it and agree with it.

And remember Jesus said, 'As it was in the days of Noah, so shall it be in the days of the coming of the Son of man.' We are beginning to see a *lawless tsunami!* Lawlessness enacted into the state codes and decrees. Remember what God says, 'Woe to those who enact unrighteous decrees,' making things that are contrary to the commandments of God, the law of the land; such as homosexual marriage. How about those things where they are mixing genes—animal and human genes? Genetic engineered plants. The way that people live.

Genesis 6:5: "And the LORD saw that the wickedness of man *was* great on the earth, and every imagination of the thoughts of his heart *was* only evil continually." I want you to get this verse here, and while you're doing your channel surfing that I recommended earlier, have that right handy. You're going to see nothing but evil, nothing but lies, nothing but violence, nothing but corruption—and it's coming into the society.

How bad was it? "And the LORD repented that He had made man on the earth, and He *was* grieved in His heart" (v 6).

- We know that God is longsuffering—don't we?
- We know that God is merciful.
- We know that God has even showed His love to the unjust and the evil and the hateful—correct?

But how bad is this?

I think we are in the period of sorrows, and I'm beginning to see more and more and more, that every family is being hit by some severe sorrowful trauma, even those in the Church, even among their own family.

“And the Lord said, ‘I will destroy man whom I have created from the face of the earth, both man and beast...’” (v 7). Why man and beast? That has to be they were mixing genetically the genes of men and animals. That's why God sent the untampered animals and birds to Noah.

I talked to a geneticist one time who said, ‘Once you get into the genes, it's really very easy to do.’ I don't know. But if we're doing it now and it's the same as it was in the days of Noah, we look and see what they're doing now and we know that's what they were doing then. Why would God destroy all life? Man and beast and the fowl of the air?

Verse 8: “But Noah found grace... [One man!] ...in the eyes of the LORD. These *are* the generations of Noah. Noah was a righteous man... [Meaning he kept the commandments of God, obeyed the voice of God.] ...and perfect in his generations... [It wasn't tampered with.] ...for Noah walked with God. And Noah begat three sons: Shem, Ham, and Japheth. Now the earth also was corrupt before God, and the earth was filled with violence” (vs 8-11).

Let's understand something about the Word of God, as I said before in fulfilling these prophecies. When it says it was ‘filled with violence,’ that is a magnitude of lawlessness that we have not yet comprehended, but we are going to see. And I've said before, and I want everyone to think about this: If you think things are bad now, what's going to happen when all the states run out of money and cannot keep the prisoners in prison? *They're surely not going to line them up and shoot them—are they? No, they're going to release them,* and they are going to come in the cities and the towns and in the countryside with a vengeance, especially those that are the hardened criminals. If they ever let them go, it is going to be hell to pay that no one can possibly even comprehend, nor no movie can really show what's going to happen. It's going to be something!

I'm not trying to scare you. I'm just trying to get you prepared. We don't know what's going to happen, but if it's going to be like this, that's exactly what's going to happen. They're already beginning

to do that because there's no room. What are you going to do with a prison that you no longer have cells and you just have a big room and you have the bunk beds stacked four high. What are you going to do? And there's not enough money to hire the guards. What are you going to do?

I talked to man recently who said he was in prison three different times. And he says, ‘The way they do it is they turn the prison operation over to the prisoners and they select certain ones to be kind of like a platoon leader in the army, where he's assigned so many of the prisoners to control.’ And he says, ‘If you get a good platoon leader, the system works good, but if you get one who is *power*—and he wants to beat up everyone and rule them,’ he says, ‘it's terrible.’ He says most of the prisons are beginning like that.

What are you going to do when these people are let go on the street? Where are they going to go? It says, v 11: “...the earth was filled with violence. And God looked upon the earth, and behold, it was corrupt—for **all** flesh had corrupted its way upon the earth” (vs 11-12). *And we are rapidly reaching that point!*

Sorry to put all the bad news in one sermon, but this is what we're going to be looking at. This is what the Bible is telling us. *This is why we need to be ‘wise as serpents and harmless as doves’ and keep focusing our minds on*

- God's way
- His truth
- our calling
- why God has called us to serve in His kingdom

We are going to be the ones who are going to have to straighten out this world after the resurrection and Christ returns. And we're going to look at world just like Noah had to endure.
